

Who are the IECO?

IECO is a forum for companies and individuals who provide consultancy services as their main business in the many fields of geosciences, survey and HSE within the Energy Industry. The membership of the organisation comprises mainly those companies that engage consultants primarily for field-related activities.

The consulting industry faces many significant challenges, both internally and in its wider relations with clients and contractors. IECO provides a forum for coherent and consistent solutions.

Integrity & Service

FAQ's

Individual Consultant Membership Cost

A low fee is charged for consultants who register as individual members, be they freelance or working through other companies which may or may not be IECO members. See web site for current fee.

Company Membership Cost

Corporate membership is currently set at a single rate, the same for all company members.

Meeting frequency

Quarterly; dates are set out at the beginning of each year.

What if I can't attend the meeting in person?

We offer conference calling facilities and any agenda's for meetings are sent out prior so that any comments you may like to add or issues you would like discussed can be presented to the Officers for inclusion.

How do I join?

An application form and contact details are available at www.ieco.org
